

## Care and Maintenance

**DO NOT ROLL DOWN YOUR WINDOWS FOR** at least 48 hours after installation.

**DO NOT CLEAN YOUR WINDOW FILM FOR** at least 48 hours after installation.

**WHY?** The installation solution needs time to dry so the adhesive can bond to the glass. Dry time is determined by weather conditions and the type of window film installed.

### WHAT TO EXPECT

Shortly after installation, a slight haze or water bubbles may appear. This is normal but if the trapped moisture persists, please return to the authorized dealer for service. Know what to expect after installation by visiting the International Window Film Association's website for more information and answers to frequently asked questions.

### IMPORTANT

Induction Automotive Window Films come with a durable scratch-resistant coating. For cleaning and drying, use a mild solution and clean, non-abrasive towels. To extend the life of your window film, adhere to the following Care & Maintenance Tips.

### CARE & MAINTENANCE TIPS
